

## Mr Taimur Shoaib

### Consultant Plastic and Reconstructive Surgeon

MB ChB, FRCSEd, DMI (RCSEd), MD, FRCSEd (Plast)

Taimur is the founder of Glasgow's first independent cosmetic and aesthetic surgery clinic. La Belle Forme. He is a senior plastic surgeon who specialises in facial plastic surgery, with a specific interest in Rhinoplasties; as well as Vaser liposuction and breast augmentation surgery.

Taimur is a fully accredited specialist consultant plastic surgeon on the General Medical Council's specialist register for plastic surgery. He was formerly a consultant in the NHS at the Glasgow Royal Infirmary, and is an accredited consultant at both Glasgow's private hospitals. He is also an honorary senior clinical lecturer in the Faculty of Medicine at the University of Glasgow.

Now Taimur devotes his time entirely to his private practice as a consultant at The Glasgow Day Surgery Centre in Glasgow and at several locations in Harley Street London.

### Skilled Plastic & Reconstructive Surgeon

Taimur runs a cosmetic practice in breast and facial surgery and during his time in the NHS was involved in the management and treatment of patients with cancers of the face and mouth (as a head and neck surgeon) and for complex skin cancers requiring reconstruction and surgery for cancer spread. He has performed cosmetic and reconstructive surgical procedures on the face, breast and body for over a decade and takes pride in the quality of the results he regularly achieves.

He qualified from the University of Glasgow in 1992 after which he trained in general surgery. This took place in the West of Scotland and in Oxford, following which he obtained his FRCS fellowship qualification in surgery from the Royal College of Surgeons of Edinburgh.

Thereafter, Taimur undertook a higher doctorate in Head and Neck Cancer Plastic Surgery at the world renowned Canniesburn Hospital in Glasgow. During this time, he helped develop a new surgical procedure called "sentinel node biopsy" in mouth cancer. He and the research team were the first to perform this successfully in this group of cancers and he has published many scientific articles on the technique. He has also lectured on the subject in many international conferences. He was subsequently awarded a higher doctorate in medicine by the University of Glasgow for his work in this area.

Taimur continued his advanced surgical training covering all aspects of plastic surgery in Glasgow, Edinburgh and Oxford. Although his training encompassed the whole remit of plastic surgery, he developed particular interests in head and neck cancer, skin cancers and aesthetic surgery.

During this time, he qualified again from the Royal College of Surgeons of Edinburgh with a Diploma in Medical Informatics. Towards the end of his training he obtained a further

qualification from the same Royal College after passing the fellowship examination in plastic surgery.

His training ended with a fellowship in head and neck cancer surgery. Working with Plastic Surgeons, ENT surgeons and Maxillofacial Surgeons in one of only five fellowships in the country at the time, and the first plastic surgeon to complete such a fellowship, Taimur worked in Oxford to learn the finer nuances of head and neck oncoplastic surgery before taking up his consultant post in Glasgow.

He has been a consultant and on the specialist register of plastic surgeons since the beginning of 2006 and enjoys a varied NHS practice. Although he specialised in head and neck cancers (of the face and mouth), he also treats people with skin cancers, cosmetic surgery requirements, plastic surgical trauma (including burns and hand injuries) and general plastic and reconstructive surgery. He also previously taught surgical skills and techniques to the trainee plastic surgeons in Scotland.

Mr Shoaib offers a broad range of procedures which are listed below:

- Breast Surgery - Augmentation/Enlargement, Reduction, Uplift/Mastopexy
- Body Contouring - Liposuction, Abdominoplasty, Arm & Thigh Lift
